

NorthernLights Inland Projects

- Two 1,000+ mile transmission lines
 - Each line up to 3,000 MW and \$1.5 to \$2.0 billion
- Link new, low-cost and clean resources to growing loads
- Coal resources
 - multiple sites > 10,000 MW total
 - Clean coal incl. IGCC
 - Carbon sequestration opportunities
 - Stable delivered costs, competitive with natural gas-fired generation
- Wind resources
 - numerous sites, large potential
 - wind integration concept
